PROFESSIONAL SUMMARY Results-driven Data Analyst and recent B.Tech IT graduate with practical experience in SQL querying, Power BI, and Python. Proven track record of building data pipelines, developing interactive dashboards, and transforming complex datasets into actionable business insights within fast-paced startup environments.

PROFESSIONAL EXPERIENCE

Data Analyst | Codeniet (Early-Stage Startup) Jan 2026 – Present

- Designed and maintained end-to-end data pipelines and warehousing frameworks, reducing data processing time by 30%.
- Built dynamic Power BI dashboards tracking key departmental KPIs, directly supporting data-driven decision-making.
- Translated business requirements into structured database models and automated reporting solutions.

Freelance Data Analyst | Jan 2025 – Present

- Developed 10+ interactive Power BI dashboards, enabling faster client decision-making and reducing manual reporting time by 40%.
- Authored advanced SQL queries (CTEs, window functions, joins) to extract, clean, and transform raw data into analysis-ready formats.

KEY PROJECTS

1. Customer Behavior & Churn Analytics | Python, SQL, Power BI

- Extracted and analyzed large-scale customer datasets using Python (Pandas) to identify purchasing patterns and predict churn risks.
- Designed an interactive Power BI dashboard to visualize customer segments, retention rates, and Customer Lifetime Value (CLV).

2. Explainable Deepfake Detection (6-Module Architecture) | Python, TensorFlow, XAI

- Built an automated data pipeline to collect and preprocess 50,000+ video frames for Machine Learning model training.
- Implemented Grad-CAM visualization to communicate model decisions to non-technical stakeholders, achieving 94% accuracy.

3. Comprehensive Web & Data Portal for ITI College | SQL, Data Architecture

- Managed the end-to-end delivery of a web portal, effectively bridging technical development with exact client requirements.
- Designed the underlying SQL database architecture to securely store, retrieve, and manage student and administrative data.

TECHNICAL SKILLS

- Analytics & BI:** Power BI, Tableau (Basic), Google Looker Studio, KPI Dashboards, Data Storytelling
- Data & SQL:** Advanced SQL, Data Modeling, Data Warehousing, ETL Pipelines
- Programming:** Python (Pandas, NumPy, Scikit-learn, TensorFlow/Keras), Statistical Analysis
- Tools & IDEs:** Advanced Excel (VLOOKUP, Pivot Tables), Git/GitHub, PyCharm, Cursor AI

EDUCATION & CERTIFICATIONS

- B.Tech in Information Technology** | Dr. M.G.R. Educational and Research Institute | 2022 – 2026 | CGPA: 7.20
- Certifications:** Python for Data Science (NPTEL - 2024) | Data Science Using R (Enlight Wisdom - 2023)
