PROFESSIONAL SUMMARY

Recent B.Tech Information Technology graduate with hands on experience in SQL, Power BI, Python, Excel, and data visualization through academic projects and startup exposure. Passionate about transforming data into actionable insights and eager to begin a career as a Data Analyst.

PRACTICAL EXPERIENCE

Data Analyst | Codeniet (Early-Stage Startup) Jan 2026 – May 2026

- Designed and maintained end-to-end data pipelines and warehousing frameworks, reducing data processing time by 30% and enabling scalable, organization-wide analytics.
- Built Power BI dashboards tracking key KPIs across departments; directly supported data-driven decision-making for leadership teams.
- Deployed machine learning models using Python (Scikit-learn, TensorFlow) to solve complex business problems and reduce operational inefficiencies by 25%.

KEY PROJECTS

1. Customer Behavior Analytics & Dashboard Power BI, Advanced Excel

- Performed exploratory data analysis on retail datasets to identify customer trends, patterns, and anomalies.
- Designed interactive reports to track retention metrics, directly supporting data-driven business decisions and reducing manual reporting efforts.

2. Explainable Deepfake Detection using Frame-Level Analysis + Grad-CAM Python, Machine Learning

- Built an automated data pipeline to collect, preprocess, and warehouse large-scale video frame datasets (50,000+ frames) for model training and validation.
- Implemented Grad-CAM visualization to communicate ML model decisions to non-technical stakeholders; achieved 94% classification accuracy using Python and TensorFlow.
- Applied statistical analysis techniques to evaluate model performance, generating visual reports in Matplotlib/Seaborn for stakeholder review.

3. Comprehensive Web & Data Portal for ITI College SQL, Client Delivery

- Engineered a centralized SQL database, organizing raw administrative datasets to ensure data consistency and secure access.
- Successfully delivered the portal by validating all database features against the initial client acceptance criteria and structured workflows.

TECHNICAL SKILLS

- Analytics & BI:** Power BI, Tableau (basic), Google Looker Studio, KPI Dashboard Development, Data Storytelling.
- Data & SQL:** Advanced SQL, CTEs, Window Functions, Joins, Data Modeling, Data Warehousing, ETL Pipelines.
- Programming:** Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Statistical Analysis.
- Tools:** Excel (VLOOKUP, Pivot Tables), Matplotlib, Seaborn, Git/GitHub, Jupyter Notebook.

EDUCATION & CERTIFICATIONS

- B.Tech in Information Technology** | Dr. M.G.R. Educational and Research Institute | 2022-2026 | GPA: 7.20
- Certifications:** Python for Data Science - NPTEL (2024) | Data Science Using R - Enlight Wisdom (2023)
