PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with practical experience in data extraction, cleansing, and validation using SQL, Python, and Advanced Excel. Skilled in performing routine data quality checks, resolving exceptions, and building automated reporting workflows. Strong analytical mindset with a proactive approach to process improvement and delivering accurate operational insights through Power BI and Tableau.

TECHNICAL SKILLS

- **Analytics & BI:** Power BI, Tableau (basic), Data Visualization, Dashboard Creation.
- **Data & SQL:** SQL (Joins, CTEs, Window Functions), Data Cleaning, Data Extraction.
- **Programming & Libraries:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.
- **Tools:** Excel (VLOOKUP, Pivot Tables, Formulas), Jupyter Notebook.

PROJECTS

1. AI-Powered Career Intelligence & Automated Document Tailoring Agent | *Python, APIs, GitHub Actions*

- Wrote a Python automation script to extract, filter, and structure data from 20+ web portals using BeautifulSoup and custom search feeds.
- Integrated Google Sheets API for live data tracking and used LLM APIs to process text outputs automatically via GitHub Actions.

2. Customer Behavior Analytics & Dashboard | *Power BI, Advanced Excel*

- Performed exploratory data analysis on retail datasets to identify customer trends, patterns, and anomalies.
- Designed interactive reports to track retention metrics, directly supporting data-driven business decisions and reducing manual reporting efforts.

ACADEMIC PROJECT

1. Explainable Deepfake Detection using Frame-Level Analysis + Grad-CAM | *Python, Machine Learning*

- Built an automated data pipeline to collect, preprocess, and warehouse large-scale video frame datasets (10,000+ frames) for model training and validation.
- Implemented Grad-CAM visualization to communicate ML model decisions to non-technical stakeholders; achieved 94% classification accuracy using Python and TensorFlow.

PRACTICAL EXPERIENCE

Data Analyst | Codeniet (Tech Startup) *Jan 2026 – May 2026*

- Collaborated with the development team to analyze internal datasets and identify business trends.
- Created Power BI dashboards and Excel reports to track key performance metrics.
- Wrote Python scripts and SQL queries to clean raw data and automate basic reporting tasks.
- Assisted in solving business problems by analyzing data and providing clear, actionable insights.

EDUCATION & CERTIFICATIONS

- **B.Tech in Information Technology** | Dr. M.G.R. Educational and Research Institute | May 2026 | GPA: 7.31
- **Certifications:** Python for Data Science (NPTEL, 2024) | Data Science Using R (Enlight Wisdom, 2023)
